

# concatenate tiff files

How can I create a multi-page TIFF file?

On OS/X it looks like *tiffutil* can do that.

<http://developer.apple.com/documentation/Darwin/Reference/ManPages/man1/tiffutil.1.html>

On Windows, TiffCombine costs \$50 but has Trial version.

<http://www.topshareware.com/TiffCombine-download-35950.htm>

If you have any experience with these or other solutions, please add them here.
