

iPad Note Taking Apps

Here are some recommended student note-taking apps for the iPad. And possibly, the 3rd and 4th ones could be used by instructors in grading papers, or students could use them to annotate course readings.

- <http://www.coursenotesapp.com/>
- <http://auditoriumapp.com/>
- <http://tnerd.com/2010/03/17/padnotes-app-for-ipad-lets-you-scribble-draw-write-and-even-more-on-your-ipad/> – Not sure if this one has arrived yet.
- [iAnnotate PDF](#) and [Aji PDF Service for Mac or Windows](#)
- [GoodReader](#) annotates PDFs and can link to many cloud services like dropbox, goggle docs, WebDAV servers, etc.
- [Pogo iPhone Stylus](#)
- Evernote for iPad: <http://www.evernote.com/about/download/ipad.php> (I already use this on my Mac for notekeeping any autosyncing to any computer. Love it! Free! -Annelie)
- Sundry Notes: <http://sundrynotes.com/> (<—added by albert)
 - free
 - keyboard input, touch based drawing
 - math and other graphing symbols
 - pdf and web page attachment
 - voice recording!!
 - seems very promising – downloaded a week ago. there has been one update so far. lots of improvments, suggesting that the developer is actively working on the app.

Revision #5
