

Online Backup Utility

[Mozy](#) is an online backup service that offers 2GB of free backup space. For pricing above that see <http://mozy.com/home/pricing/>. Additional features include:

- Incremental backups
- Open and locked file support
- In-Windows Explorer restore
- Support for files greater than 3 GB
- Automatic Microsoft Outlook file detection and backup
- Mac OS X support
- Encrypted file transfer
- Encrypted files on the server
- Private encryption key option
- Unlimited Backup

You may want to check with someone in IT policy if you are backing up sensitive (e.g. FERPA) information on a third party server. ^^

[BackBlaze](#) is another online backup service that provides unlimited storage for a monthly/yearly/biyearly fee. It backs up almost all files (with a few exceptions like system files, application files and time machine files — see its website for details) on your local drives as well as external drives (but not network drives).
