

Software for ethnographic and qualitative data analysis

[Dedoose](#) is a software tool developed by UCLA faculty, Thomas Weisner and Eli Lieber for use in mixed methods research. It is web based, allows for collaboration, has a suite of visual tools, supports text analysis and the datasets can be imported and exported to other qualitative software, Excel, or other statistical packages. There is a 30 day free trial version available.

Here is a link to a [webinar demo](#) held at UCLA's Young Research Library on July 24, 2013. Presenter is Eli Lieber.

To sign up for a (free) upcoming demo,
[see this Dedoose blog ...](#)
