CCLE Feedback activity

The members of my collaboration site want to issue a survey to UCLA members who are not part of the collab site. How can we do this?

Using the Feedback activity, you can make it "public" following these steps:

1) In the course settings, set Guest access – Yes

2) Create the feedback activity.

3) In its settings set it to Group mode – No groups and Grouping – None

4) In Permissions, go to Advanced role override – Authenticated user

5) Set mod/feedback:view and mod/feedback:complete to allow for Authenticated user
