

I want to email an Outlook business card with the "notes" section of the card included. How can I send the card with this section included in the card

I was able to figure it out. I can't delete this question so if anyone wanted to know:

- 1) Right click on contact
- 2) Select "Send full contact: In Internet Format vcard"
- 3) Voila, an email window pops up with the full card attached.
