

Importing Calendar Items into Outlook 2016

This document provides a step-by-step set of instructions on how to import calendar items into Outlook 2016 for Microsoft Windows.

Right click the following link for [UCLA Holidays 2021](#) or this link for [UCLA Academic Calendar 2021](#) and choose to save the attachment. You can choose a location on your computer, or accept the default, which will be Downloads.

- Open Outlook, from the Menu Bar click on **File, Open & Export** choose **Open Outlook Data File**.

- In the Import and Export Wizard, choose “**Import an iCalendar (.ics) or vCalendar file (.vcs)**” and click **Next**.

- In the browse dialog box, choose the folder you saved the file to, by default it is the Downloads folder, select the file and click **OK**.

- Click **Import** in the dialog box.

The calendar items will now appear in your Outlook calendar.

NOTE: Do not perform this procedure on the same import file more than once. Doing so will result in duplicate entries in your calendar. If you add United States Holidays provided by Outlook to your calendar it may also result in some duplicate holidays in your calendar.
