

# Direct IP Printing from OS X

This document provides a step-by-step set of instructions on how to add a printer to Apple OS X using direct IP Printing.

Open System Preferences and click on Printers & Scanners.

On the Printers & Scanners dialog box, click the + sign to add a new printer.

Click IP, enter the IP address of the printer, change the protocol to IP Printing Protocol. Click on the Add button when it becomes available.

Your computer is now connected to the printer
