

Hummingbird HostExplorer Full Screen Mode

In Hummingbird HostExplorer for Win32, full-screen mode “hides the title, menu and tool bars, so that the session window occupies the entire screen” [HostExploer 9.0.0.1 help file].

To activate full-screen mode, (1) select “View” from the menu and then (2) select “Full Screen”.

To deactivate full-screen mode, press “CTRL+Shift+F”.
