

Managing OS X

OS X Server's SUS (update server) can manage OS X workstation's updates (e.g, <http://support.apple.com/kb/ht4069>). Some may desire additional options and functionality.

Other programs include—

- JAMF Software's **Casper Suite**, <http://www.jamfsoftware.com/products/casper-suite/>
- **Simian**, <http://code.google.com/p/simian/>
- **Munki**, <http://code.google.com/p/munki/>

See also—

- ***Managing Macs at Google Scale***, <https://www.usenix.org/conference/lisa13/managing-macs-google-scale> (~40min video)
