

Uninstalling Roxio software

Roxio Creator is a common preinstalled application on many OEM systems. You may wish to remove it to reduce system overhead or in favor of your preferred CD burning program, such as Nero, Imgburn, CDRWin, etc.

Uninstallation via Add/Remove Programs in Windows normally works, but to fully clean up any remaining fragments, the following Roxio KB article is helpful:

<http://kb.roxio.com/content/kb/Creator/000086CR>

Special instructions for Windows Vista:

<http://kb.roxio.com/content/kb/Creator/000127CR>
