

# What is the IP Address of my computer?

For Windows 2000/XP/2003

1. Click on the Start button
2. Select Run
3. Type "cmd" or "command"
4. Type "ipconfig"

The system's IP Address, Subnet Mask, and Default Gateway should be on display

Type "exit" once you have reviewed the information.

• • •

Typing "ipconfig /all" gives details for all network connections, active or not.

• • •

Or go to <http://www.whatismyip.com> to find out what IP address other servers think you are.
