Mac OS Printing on Dell 2130cdn

1. Download and install the following (order matters!)
   - http://www.openprinting.org/download/printdriver/macosx/gplgs-8.64so-ub.dmg
   - http://www.openprinting.org/download/printdriver/macosx/foomatic-rip-4.0.2.211.dmg
   - http://www.openprinting.org/download/printdriver/macosx/pxlmono-1.6.dmg
   - (EDIT:) Updated packages for the above are at http://www.openprinting.org/download/printdriver/macosx/

1. Go to printer menu
2. Add +
3. Select LPD
4. Address
5. Printer Using → Select a diver to use (You might have to repeat this step if the option closes automatically)
6. Select Generic PCL 6/PCL XL Printer Foomatic/pxlcolor
7. Add the printer
8. In your browser type: http://127.0.0.1:631/printers/
9. Click on Set Printer Options for the new printer
10. Change Printing mode: Normal
    - If you have duplexer and would like to use it by default: Change Double-Sided printing: On (Flip on Long/Short Edge)
