

# Ultrabook Hard Drives

The ultrabook specification uses thinner than usual laptop hard drives. Some lightweight laptops, though not specifically ultrabooks, may also use these thinner 7mm z-height 2.5" SATA hard drives. Typically, these hard drives are single platter.

Some current options are:

- **Momentus Thin**, <http://www.seagate.com/internal-hard-drives/laptop-hard-drives/momentus-thin/>
- **Travelstar z-series**, <http://www.hitachigst.com/internal-drives/mobile/travelstar/travelstar-z7k500>
- **WD Scorpio Blue** ("L" models), <http://wdc.com/en/products/products.aspx?id=140>
