Forcing a page break with CSS

Here is a simple style sheet method for making a web page have page breaks, or form feeds in it.

Example:

Try going to the following example page and printing it. It will come out on two separate pages.

http://www.sscnet.ucla.edu/test/formfeed.htm

Source Code:

```
1. <html><head><title>Form Feed Test</title>2. <STYLE TYPE="text/css"> P.newpage {page-break-bef
```

Explanation:

- Line 2 is where you set up your style sheet definition.
- Line 6 shows what you put wherever you want a page break.
