

html entity conversion website

If you've ever inadvertently pasted a block of html into a GUI text editor and ended up with a set of html encoded greater than signs and other unreadable codes, this website helps you quickly convert back.

<http://htmlentities.net/>

Here's an example:

```
&lt; /strong&gt;
&lt; /p&gt; &amp; #010; &lt; p&gt; &lt; strong&gt; &lt; i&gt; Participatic
&lt; /i&gt; &lt; /strong&gt; You are expected to complete ...
```

Decodes to:

```
</strong> </p>#010; <p><strong><i>Participation: </i></strong>You are expected to complete ...
```
