

# SAML

- **SAML** Security Assertion Markup Language

[http://www.oasis-open.org/committees/tc\\_home.php?wg\\_abbrev=security](http://www.oasis-open.org/committees/tc_home.php?wg_abbrev=security) Albert Wu suggested we look at this for Authorization Service instead of creating our own xml and schema.

- OpenSAML <http://www.opensaml.org/faq.html> C++ and Java sample clients.
- Albert Wu – Here is a quick set of slides explaining at a very high level some of the security related XML schemas (including SAML) out there...
