How do I make Matlab or other additional resources available for my class?

For Engineering classes, please read the following:

The flash tutorial, Requesting SEASnet resources, will visually show you how to request additional SEASnet Resources for your class.

If you do not have flash installed, the following are the instructions to request additional SEASnet Resources.

1. Login to courseweb.seas.ucla.edu.
2. In your “My CourseWeb” section find the box labeled “Instructor of” or “TA of” in the left-hand side.
3. Click on “Resources: Not Activated” for the class you want to request additional resources.
4. You will see a form to fill out. Please enter in the needed information.
5. Once you are done filling out the form, click on “Submit” and your request will be sent to SEASnet in order to be processed.
