Information Technology Planning Board (ITPB)

The Information Technology Planning Board (**ITPB**), a joint Administration-Senate committee, is the primary governance and oversight body for information technology[1] and services at UCLA. The Board has purview over UCLA's information technology strategies, which include consideration of technology infrastructure, the increasingly interrelated realms of academic and administrative computing, and central vs. distributed deployment of resources. It is the successor organization to the Academic Information Technology Board (AITB). This charter will be incorporated into the formal charge letter to the ITPB.
