Has anyone tried SQLShare?

Has anyone tried SQLShare? http://escience.washington.edu/sqlshare

Based out of U. Washington, which is where I heard of it, “SQLShare is a database service aimed at removing the obstacles to using relational databases: installation, configuration, schema design, tuning, data ingest, and even application design. You simply upload your data and immediately start querying it.”

Please add your experiences or comments or alternatives here. Thanks
