

Where can I go for hard disk and storage-related performance

I like this site:

[Storage Review](#)

“This paper may be of interest – study done by Google on over 100,000 drives they have/had in service. When they fail, why they fail, what correlates with failure.”

https://static.googleusercontent.com/media/research.google.com/en//archive/disk_failures.pdf –
from email to UC-CSC list by UCI colleague Harry Mangalam

"A nine year study of file system and storage benchmarking (2008)":
